

SIX SENSES

LAAMU

JUNIOR
MARINE
BIOLOGY
PROGRAM

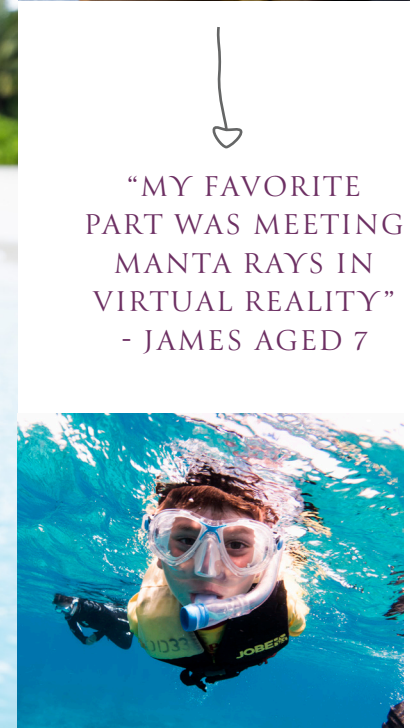

The Junior Marine Biology Program

Is your child always asking questions about the world? Are they fascinated by the ocean and the animals that live within it? Do they want to change the world and make it a better place?

Budding conservationists aged 6 to 16 are invited to join the MUI team for the Junior Marine Biology program!

Young ocean lovers will complete exciting science experiments, explore the ocean in snorkeling adventures, and learn to make their own conservation videos! MUI has designed the first 5 specialties and have crafted many more for you to choose when you want more.

“MY FAVORITE PART WAS MEETING MANTA RAYS IN VIRTUAL REALITY”
- JAMES AGED 7

THE MALDIVES UNDERWATER INITIATIVE

Made up of marine biologists from the resort and three partners- the Manta Trust, Blue Marine Foundation and the Olive Ridley Project- The Maldives Underwater Initiative (MUI) brings together the greatest minds in marine conservation to find innovative solutions for Laamu's most pressing issues.

The Specialties

*MUI has designed the first 5 specialties, but the fun doesn't stop there!
There are many more adventures for you to choose when you want more.*

STUDYING THE SEA

What makes a scientist?
And how can you do science
wherever you are? Come find
out and then create your very
own science experiment!

HOW WE GOT HERE

Learn the fascinating process
that formed the islands and
atolls of the Maldives, then go
on a special snorkel searching
for evidence that our islands
are still alive and growing.

HOW TO HELP

Discover why our animals
and environments need to be
protected. Then (become the
next David Attenborough)
create your very own
conservation video!

MEGAFUNA

The large animals of the ocean can be the most mesmerizing and interesting. Learn about their amazing adaptations that help them live in the ocean and try to find them in the water with a special snorkel.

HABITATS OF LAAMU

Beaches, reefs, mangroves, and seagrass are just some of the marine habitats here at Laamu. Find out how they are all connected and come explore the ones we have at Six Senses.

Let's Dive Right In!

Interested in being part of the Junior Marine Biology program? Here's what you need to do:

1. Mention your interest in the program with our reservations team at the time of your booking. The MUI team will start counting down the days until your adventure!
2. Bring with you your swimmers, reef safe sunscreen and passion for the marine world, we'll provide the rest.
3. When you arrive meet with a member of the MUI team (they're the ones in blue) to discuss your interests and how many specialties you're thinking of completing.
4. Chat to your GEM who will confirm your booking and schedule in your first session.
